

Alternative Elements

Comprehensive Range | Leading Performance | Quality Product

There is an alternative...

As filtration specialists, Walker Filtration manufactures and supplies one of the most comprehensive and competitively priced ranges of Alternative Filter Elements and Separators in the market today.

Designed to fit Original manufacturers' equipment, our extensive - UK-made - range of Alternative Elements is manufactured using only the highest quality components. Utilising high efficiency filtration media, multi-wrap and pleated element technology, and industry leading custom engineered drainage layers, Walker Filtration alternative elements deliver minimal operating pressure loss, high efficiency filtration and guaranteed performance.

Every one of our Alternative Elements performs 'equal or superior to' the original manufacturers, meeting or exceeding the original OEM's specifications and relevant ISO 8573-1 quality classes when tested at their rated flow conditions in accordance with ISO 12500 series of standards.
