

PRODRY

Introducing a New Generation of Desiccant Dryers | PD0046 to PD0360
Flow rates 45 scfm (77 Nm³/hr) to 360 scfm (612 Nm³/hr)

The all new Walker Filtration PRODRY models feature major design changes that deliver significant energy savings, dramatically reduced service times and optimum performance across the range.

Tested and validated to international standards, PRODRY's multi-voltage capabilities allow for worldwide installation.

Now with the option to upgrade to advanced dewpoint management for even greater operating efficiency - whatever your application requirement, PRODRY's optimum performance delivers a compressed air drying solution you can trust.

Optional Dewpoint Management Control delivering up to **81%** increase in operating efficiency and annual energy savings of up to **£5921***

* Operating efficiency and energy savings based upon installing a DMC controller and running with a flow of 360 scfm (612Nm³/hr) at 7 barg (100 psig) inlet pressure and 35°C (95°F) inlet temperature, operating at 10% load for 6000 hours.

Unique Purge Plug
Select orifice size to suit changing pressure requirements (Patent Pending)

Tower Pressure Gauges
Clearly visible diagnostics for accurate pressure readings

Optional DMC Controller
Advanced dewpoint management & energy savings

- 1** Dewpoint management sensor (hygrometer) increases operating efficiency up to **81%** (fitted with DMC controller)
- 2** Top loading cartridge design and lifting handle for fast and efficient servicing
- 3** Compact modular design with built-in lifting hook
- 4** Multi-ported manifold for flexible installation
- 5** Advanced desiccant blend delivers optimised dewpoint and improved performance
- 6** Intelligent LED controller with built-in energy management (supplied as standard)
- 7** Anodised aluminum extrusions provides corrosion protection
- 8** Externally fitted silencers for dramatically reduced service time

* Stated flows are for an inlet pressure of 7 barg (100 psig) with reference to 20°C, 1 barg (abs.), 0% relative water vapour pressure. For flow at other pressures apply the appropriate correction factors, terms and dewpoint.

** For full dewpoint management control state 'DMC' with dewpoint Sensor (hygrometer) when asked what controller type you require upon placing your order.

Technical notes

- On Models PD0046 – PD0360 Walker Filtration recommends that an XA (0.01 micron) pre-filter, is installed upstream of the dryer and an RXA (0.01 micron) dust filter is installed downstream of the dryer.
- Walker Filtration Water Separator supplied as standard. Walker Filtration Water Separator must be installed. If bulk water enters the adsorption dryer, it can cause heat expansion to the desiccant, substantial rise in the dryer differential pressure, lead to poor outlet dewpoint, and cause potential dryer failure.
- All dryer applications and sizing should be confirmed by Walker Filtration. Please contact nearest sales team for information on recommended sizing and air quality for your application need.
- Full Dewpoint Management Control (DMC) option includes digital dewpoint display and dewpoint sensor (hygrometer), providing advanced dryer control based on outlet dewpoint.
- Floor fixing dimensions are given in the above illustrations.
- For PRODRY sizing and further information on service kits and accessories, please refer to the PRODRY price guide or brochure.
- High Performance Cartridges are required for applications where -70° and -74°C dewpoints are required
